ODP 4003-77
4 November 1977

MEMORANDUM FOR: Acting Deputy Director for Administration

FROM   :   Clifford D. May, Jr.
                    Director of Data Processing

SUBJECT   :   ODP Report for Week Ending 4 November 1977 (U)

25X1A

▆▆▆▆ Searched for DCI (U)

(U)   A priority request from Admiral Turner was processed
by the Special Center on 1 November. The request required
a complete search of DDO's ▆▆▆▆▆▆▆▆▆ data base and   25X1A
consumed six hours of machine time. ▆▆▆▆▆▆▆   25X1A

Budget Reduction in the Number of FY-79 Computer Terminals (U)

(U)   We prepared a response to a FY-79 budget issue. The
OMB and Intelligence Community Budget Examiners recommended
a 31% reduction in the number of computer terminals planned
by ODP for FY-79. This would reduce the number planned from
25X1A 161 to 111. ▆▆▆▆▆▆

CIA/DIA Building Collocation Study (U)

(U)   Management Staff prepared a paper on the possible ADP
benefits of CIA/DIA collocation at Langley. This paper was
requested by the Office of Logistics as additional information
for a DCI-tasked study. ▆▆▆▆▆   25X1A

Support to Office of Finance (U)

(U)   GAS - General Accounting System. The General Ledger
Monthly Update program was changed to increase the allowable
number of Obligation Reference Numbers (ORN's) for any employee
from 100 to 300. All Quarterly Reports were produced but
were delayed by the Fiscal Year-End Closing. ▆▆▆▆▆   25X1A

Support to Information and Privacy Staff (U)

(U)   IPSLOG - Information Privacy Staff Log. The request to   25X1A
automate the IPSLOG has been completed. Approximately 1800
person hours and $11,000 in computer cost were expended in
this effort. The IPSLOG system is supported by GIMS. ▆▆▆▆▆

CAMS (U)

(C)   CIA CAMS project personnel received a demonstration of
DIA's Advanced Imagery Requirements and Exploitation System
(AIRES) this week. DIA's Sperry-Rand dual screen terminal
was most impressive. AIRES is scheduled to achieve initial
operating capability in January 1978. At this time, the
computer-to-computer interface between CAMS and AIRES through
the Datex switch will be activated.

ADSTAR (U)

(U)   ADSTAR site planning data was turned over to Office of
Logistics. A copy of the package was given to Office of
Central Reference's ADSTAR Requirements Officer.   25X1A

RAPID (U)

                                                                     25X1A
(U)   Meetings are in progress between Office of General Counsel
and the other Agency components involved in RAPID to put to-
gether a chronology of the RAPID project.

TADS (U)

(U)   An update to the June 1977 development schedule was
received from the contractor this week. This revised schedule
does not affect the completion date of 30 June 1978. However,   25X1A
any slips in this new schedule may delay delivery. As a
result of this scheduling, the third Critical Design Review
will be held on 2 December rather than 11 November 1977.

JES3 Software Problem Fixed (U)

(U)   On 1 November, emergency maintenance was applied to the
JES3 system to correct the problems experienced with JCL
references to Generation Data Groups (see Weekly Report dated
21 October 1977). The applied maintenance should correct all
of the known problems which have been responsible for the
extensive down time on the JES3 batch system during the past
two weeks.

FRS Gearing Up for Congressional Budget (U)

(U)   ODP began loading data into the FRS data base for the
Congressional Budget cycle on 27 October. This exercise
will continue through 4 November. Worksheets for the
Directorate budget offices should be produced by 7 November.
At that time budget officers can begin working with the data
through their online terminals.   25X1A

25X1A (left margin)

2

Training (U)

(U) A three day course, EDP Orientation, was completed by
24 students. ODP conducted the CIA portion of OTR's Survey
of Intelligence Information Systems for personnel from the
Intelligence Community. ██████ ████████████
